

**Title: Advancements in Finfish Aquaculture**

**Date and time: September 7, 2023 at 13:30 pm to 14:50 pm and 15:20 pm to 16:40 pm**

**Presentations: 8 x 15 minutes each (plus 5 minutes each for questions)**

**Overview:**

Advancements in research and technology have played a key role in the global increase and development of global Atlantic salmon aquaculture. The Atlantic salmon aquaculture industry is constantly innovating and identifying new technologies that support the culture of Atlantic salmon under changing environmental and social conditions.

The aim for this session is to highlight current technological and scientific advancements in Atlantic salmon farming. The specific topics will include:

- Triploids salmon production
- Scoot Science's SeaState Platform
- Bubbler technology for jellyfish deflection
- Research in areas including Atlantic salmon physiology and vaccinology
- Other innovations in salmon and trout aquaculture production

**Session Chairperson:**

Jillian D. Westcott, BSc, BEPS, MBA, PhD (she/her)

Academic Director/Graduate Officer

School of Fisheries,

Fisheries and Marine Institute of Memorial University of Newfoundland and Labrador
