

Title: Alternative Species

Date and time: September 7, 2023 at 9:00 am to 10:20 pm

Presentations: 4 x 15 minutes each (plus 5 minutes each for questions)

Overview:

Aquaculture is a promising industry with growing demand from markets around the world. With our industry expertise, our Province is well positioned to establish itself internationally and capitalize on the growing global aquaculture market.

The Province is seeking to diversify and expand aquaculture development in NL. A multispecies strategy is underway with a focus on supporting new species research and development .

Through the development of a multi-species aquaculture industry, we can further strengthen our industry while providing strong jobs and increasing our competitive advantage to succeed internationally.

The aim for this session is to highlight alternative species currently of interest in NL . The specific topics that could be covered in this session are:

- Marine Plants
- Wolffish
- Cunner
- Sea Urchin
- Other emerging species or species groups
